

COMP211 Database Design – Peer Evaluation Form

Each member of a project group might not receive the same individual project score. While there is an overall score to the project as a whole, each individual's score will be affected by the score of a confidential peer evaluation.

Each group member is required to evaluate the contributions of each of the other members of the group with regard to the percentage contributed by each member to the successful completion of all phases of the project, and the cumulative points for each group member will be averaged and then be added to the overall project score to become the individual project score. **Your marks from peer evaluation will be adjusted proportionally based on the phases of the project you have submitted.**

Please fill out and submit the peer evaluation form for each group member. **Please note that if you fail to submit peer evaluations, you will get zero marks for the part on peer evaluation.**

Write the student ID and student names of your group that is being evaluated on the lines below. **The order of the student names should be the same for all the evaluation forms** submitted by each member of your group.

	Student ID	Student Name
Student A		
Student B		
Student C		
Student D		
Student E		

Personal Statement: Write a summary of your contribution on this group project for each of the phases 1, 2 and 3.

Place the number of points in the blanks below that BEST describe how you feel about a peer's participation regarding each statement. A rating of 3 should represent that a member has contributed adequately and/or proportionately in that category. Rating of 4 should represent higher contributions (more than average) and implies that other members have contributed less (ratings of 1 and 2). A rating of 0 may be used to indicate that a group member did not contribute in any manner.

Be honest in your evaluations, rewarding someone who did not fully participate is not fair to the group. Add the points and fill in total at the bottom. Each group member's points will be averaged among the evaluation sheets of the group members. For example, if you receive a 14 and 12 from your group members, your points would average to 13 out of 20.

Note: Special arrangement for students whose contribution is not satisfactory

- Student with average ≥ 5 and < 10 will get 1/2 of the overall score to the project
- Student with average > 0 and < 5 will get 1/4 of the overall score to the project
- Student with average = 0 will get zero for overall score to the project

4 points-strongly agree	Contributed more than average (i.e. others less than average)
3 points-agree	Contributed adequately and/or proportionately
2 points-somewhat agree	Contributed to a certain extent, but below average
1 point-somewhat disagree	Contributed only a small portion
0 points-disagree	Contributed nothing

Put X's in your own column. Each field defaults to a 4 if you fail to provide a value. Think carefully. If you give a 4 to others, it might result in an adjustment of 1 or 2 for your contribution.

	Student A	Student B	Student C	Student D	Student E
This person helped organizing the project work to meet group objectives					
This person fulfilled his/her responsibilities in the completion of the project					
This person has done an appropriate share of the overall project work					
This person was willing to listen to the other group members' ideas					
This person provided ideas and support to complete the project work					
Total Points (maximum 20)
